Subject: First CV Raman Memorial Lecture

Peter,

I want to thank you for a great talk! Your ring-side view of the development of the field of fiber optics - combining the big picture and the significant details all the while relating the back story of what happened and how it happened - all made for a really engrossing talk. I was really happy to see how well the panelists interacted with you.

The feedback I am getting from some of the panelists is out of this world. I received these just within a minute of the ending of the event.

" The lecture by Peter Schultz was superb, quite interesting and illuminative. IEEE Hyderabad section can be proud of having him (in virtual mode) as a speaker for the CV Raman memorial lecture. We are lucky to listen to this giant in the subject of optical fibers--kind courtesy the Photonics Society and YOU."

" Wonderful. Thank you for organizing the first CV Raman lecture so well - it will be remembered for years to come."

Best regards,
Kasyapa Balemarthy
